Noémie Gosselin

Financial Accounting For Undergraduates 2nd Edition Ferris Introduction

Financial Accounting for Undergraduates

Financial Accounting: An introduction is an essential companion for students on introductory financial accounting modules within undergraduate accounting and business degrees. The authors' self-directed learning approach provides extensive opportunities for those new to the subject to test their learning, try out questions from the main exam bodies and build-up their ability to deal with challenging problems. Its comprehensive coverage will provide students with: a sound understanding of the conceptual framework and key concepts of accounting the ability to account for transactions up to Trial Balance and to prepare financial statements the ability to extract accounting ratios and prepare a report analyzing the statements.

Financial and Managerial Accounting for Undergraduates

Created by the continuous feedback of a student-tested, faculty-approved process, Financial ACCT2 delivers a visually appealing, succinct print component, tear-out review cards for students and instructors and a consistent online offering with CengageNOW that includes online homework, an eBook, and access to additional study aids all at a value-based price and proven to increase retention and outcomes. Important Notice: Media content referenced within the product description or the product text may not be available in the ebook version.

Financial Accounting for Undergraduates

Created through a \"student-tested, faculty-approved\" review process with over 300 students and 100 faculty, Financial ACCT is an engaging and accessible solution to accommodate the diverse lifestyles of today's learners. ACCT employs an engaging narrative that emphasizes strong and effective examples to convey and reinforce fundamental managerial accounting concepts and procedures. In an attempt to avoid excessive detail, the book focuses on the core concepts that students need to learn in the course through the use of streamlined chapter objectives, clarity of examples, and a visually engaging design. The book package is complemented by chapter review cards that can be useful study aids for quizzes or exams as well as a premium website that contains a host of valuable multimedia tools that aid in comprehension of the most important topics. Every new copy of the text, in addition, comes with access to CengageNOW, a powerful homework software program that allows students to work exercises and problems from the textbook online.

Managerial Accounting for Undergraduates

Accounting for Non-Accounting Students is a highly reputed text for its accessibility and clarity. The book combines user-friendly language and real world examples making it ideal for students with little or no prior knowledge of Financial or Management accounting. The text covers the essentials of book-keeping and the rules of accounting in a non-technical style and teaches students the right questions that all non-accountants

should ask who want to excel in their studies and career.

ISE Introductory Financial Accounting for Business

CORPORATE FINANCIAL REPORTING is written for students who require an understanding of financial accounting and reporting issues, problems, and practices. It is appropriate for the second financial accounting course at the MBA level, often called Corporate Financial Reporting. This text is also appropriate for schools that offer a one semester Intermediate accounting course, at the undergraduate level, for Finance majors. Careful consideration is given to the management aspects associated with various financial reporting issues. Chapters blend issues, concepts, standards and stakeholder interests to convey the complexities, controversies and uncertainties inherent in the financial reporting process.

Financial Accounting for Undergraduates

This is a great value multipack consisting of Lewis & Pendrill: Advanced Financial Accounting (0273638335) and Black: Students Guide to Financial Standards (0273683500).

Financial Accounting

Accounting for Non Accounting Students is the perfect addition if you need to grasp the fundamentals of financial and management accounting. This book assumes no previous accounting knowledge, and with its clear writing style, combined with real world examples, it offers what you need to help you advance in your studies. Alongside the book, you can visit the new Accounting for Non-Accounting Students companion website at www.pearsoned.co.uk/dyson to access a comprehensive range of student-learning resources, including additional questions, web links for further reading and a glossary of key terms.

Financial ACCT2

An introduction to financial accounting for undergraduates.

Financial Accounting and Reporting

Now in its fifth edition, this text is written as an introduction to accounting for students with no prior knowledge of the subject. It includes extensive use of real-life corporate case studies, and this edition comes with an alternate set of end-of-chapter exercises on an accompanying CD-ROM.

Financial Accounting for Undergraduates

This book provides an introduction to both financial accounting and cost and management accounting for students of all disciplines. Throughout the text, examples, questions and problems allow students to practice the application of theory.

Financial Accounting and Reporting

The financial analysis perspective that this text represents is an analytical approach to International Accounting. Instead of focusing on individual FASB's that constantly change, this text teaches students the concepts behind the standards. Along with this unique approach, the main strengths of this text are its plentiful end-of-chapter material and its use of focus countries to demonstrate accounting systems. This second edition will continue to build on those strengths, as well as update focus countries.

Financial ACCT

Fundamentals of Financial Accounting, 2e, by Phillips/Libby/Libby presents an engaging, balanced, and appropriately paced analysis of the fundamentals of financial accounting. Its conversational writing style makes it easy to read and understand, while the selection of real focus companies reinforces the relevance of accounting by introducing students to accounting and business activities in the context of their favorite companies. Balance between preparer and user orientations is achieved throughout the book, by studying both the accounting activities that take place inside the company, as well as evaluating their impact on decisions, and users outside the company. Topic coverage is paced appropriately for students new to accounting, and is thoroughly reinforced every step of the way with an ample variety of innovative pedagogical tools. Clearly understandable, relevant, and accessible, FFA is simply the most student-friendly financial book on the market and provides the tools for students to grasp financial accounting from the ground up.

Accounting for Non-Accounting Students

Designed for students studying introductory financial accounting as part of a business degree or MBA, this textbook includes examples and exercises to aid students' understanding.

Corporate Financial Reporting

This helpful supplement augments each chapter and appendix with reviews of the learning objectives, outlines of the chapters, summaries of chapter materials, and additional problems with solutions.

Advanced Financial Accounting with Students Guide to Accounting and Financial Reporting Standards

Master the latest insights, lessons, and best practice techniques for accurately valuing companies for potential mergers, acquisitions, and restructurings. Concise, realistic, and easy to use, Valuation for Mergers and Acquisitions, Second Edition has been fully updated to reflect the field's latest and most useful \"rules of thumb,\" compare every modern approach to valuation, offering practical solutions for today's most complex and important valuation challenges. Treating valuation as both an art and a science, it covers the entire process, offering up-to-the-minute real-world advice, examples, and case studies. Leading valuation experts Barbara S. Pettit and Kenneth R. Ferris introduce and compare leading techniques including discounted cash flow analysis, earnings multiples analysis, adjusted present value analysis, economic value analysis, and real option analysis. They fully address related concerns such as the accounting structure of deals, accounting for goodwill, tax considerations, and more. Throughout, they identify common errors that lead to inaccurate valuation, and show how to avoid them. From start to finish, this guide doesn't just make valuation comprehensible: it provides the tools and insight to make valuation work. For all financial professionals concerned with valuation, especially those involved in potential mergers, acquisitions, and restructurings; and for corporate finance instructors and students in Executive MBA programs concerned with valuation.

Financial Accounting for First Year Students

Like the most successful businesses, this text successfully integrates innovation with tradition by showing how the preparation of financial accounting information is useful to today's student of business. CORPORATE FINANCIAL ACCOUNTING uses the preparation of financial statements as the framework for understanding what accounting is all about.

Accounting for Non-accounting Students

A new collection of corporate finance best practices for establishing accurate valuations... 2 authoritative

books, now in a convenient e-format, at a great price! 2 authoritative eBooks help you accurately value companies and assets for M&A, restructurings, and key corporate investments. Valuation decisions can make or break the success of any merger, acquisition, restructuring, or large-scale corporate investment. Few areas of finance are so important -- or so challenging. This unique 2 eBook package brings together comprehensive and up-to-date guidance for arriving at valuations you can rely upon. *Valuation: Methods and Models in Applied Corporate Finance* is focused entirely on achieving useful results -- avoiding ivory-tower theory you don't need and elementary material you already know. George Chacko and Carolyn L. Evans present a 100% practical and rigorous approach to conducting valuation. Step-by-step, they address the projection of financial statements, calculating free cash flows, risk-adjusted cost of capital, and several leading methodologies, including WACC, flow-to-equity, and APV. Throughout, each concept is explained with realistic examples, and demonstrated with accessible math. No previous mathematical understanding is required beyond basic algebra, probability, and statistics: wherever more advanced math is required, the authors explain it fully. Next, in *Valuation for Mergers and Acquisitions, Second Edition*, Barbara S. Petitt and Kenneth R. Ferris present a complete, practitioner-oriented view of valuation in the context of M&A and corporate restructurings. Petitt and Ferris guide you through performing a target's financial review, developing forecasts, and assessing the sensitivity of these forecasts to key assumptions. You'll review both traditional and alternative valuation methods, from the basic P/E ratio to a wide range of discounted cash flow models, economic value analysis, and real option analyses. The authors also address closely-related issues such as accounting, financial reporting, and tax considerations. Throughout, you'll find realistic advice for making more informed choices, handling common dilemmas, and overcoming common errors -- all illuminated with real-world examples and illustrations. Whatever your role in establishing valuations or making corporate investment decisions, this collection will help you reduce your risks and improve your performance. From world-renowned valuation experts George Chacko, Carolyn L. Evans, Barbara S. Petitt, and Kenneth R. Ferris

Financial Accounting

Fundamentals of Financial Accounting, presents an engaging, balanced, and appropriately paced analysis of the fundamentals of financial accounting. Its conversational writing style makes it easy to read and understand, while the selection of real focus companies reinforces the relevance of accounting by introducing students to accounting and business activities in the context of their favorite companies. Balance between preparer and user orientations is achieved throughout the book, by studying both the accounting activities that take place inside the company, as well as evaluating their impact on decisions, and users outside the company. Topic coverage is paced appropriately for students new to accounting, and is thoroughly reinforced every step of the way with an ample variety of innovative pedagogical tools. Clearly understandable, relevant, and accessible, *Fundamentals of Financial Accounting* is simply the most student-friendly financial book on the market and provides the tools for students to grasp financial accounting from the ground up.

Financial Accounting

Once students see that accounting is the language of business, they are on their way to academic & professional success. Jeffrey Waybright's 'Financial Accounting' translates the essentials of accounting to students so they understand 'why' and 'when' financially-sound decisions are made in business today.

Financial 2 ACCT

This Valencia College edition of *Fundamental Financial Accounting Concepts 8th Edition* by Edmonds/McNair/Olds is designed for the undergraduate introductory financial accounting course, specifically for those wanting to focus on the relationships between business events and financial statements. This text is also appealing to those instructors looking for a shorter text that focuses more on key financial accounting concepts rather than procedural details, and to those desiring a stronger user orientation in their course. Overview: Students are often overwhelmed by the amount of information

presented in the introductory financial accounting course. By focusing on fundamental concepts in a logical sequence, students are able to fully comprehend the material rather than memorize seemingly unrelated terms and topics. The goal of Fundamental Financial Accounting Concepts is to enable students to understand how any given business event affects the financial statements. The financial statements model is a highly praised feature because it allows students to visualize the simultaneous impact of business events on all of the key financial statements (the income statement, the balance sheet, and the statement of cash flows). -- provided by publisher.

Financial and Management Accounting

This edition of 'Accounting and Finance for Non-Specialists' provides comprehensive coverage of the basic concepts and practical applications of financial accounting, management accounting and financial management.

International Financial Reporting and Analysis

Provides students with a history and context to current accounting procedures in an accessible and user friendly manner.

Fundamentals of Financial Accounting w/Landry's Restaurants, Inc 2005 Annual Report

Advanced Financial Accounting, 10e is designed to serve either the undergraduate or graduate level of advanced accounting. It features logical structure and careful explanation of complex topics to enhance instructor teachability and student comprehension. The text provides complete coverage of accounting and reporting for mergers and acquisitions, including business valuation, consolidated financial statements, foreign currency translation and transactions, derivative financial instruments, state and local governments, not-for-profits, partnerships, and bankruptcy.
